

Automatic Paged Machine

The paged machine is used to automatically separate stacks of packing bags or cards and convey single piece onto the conveyor belt so as to facilitate the coding machine.

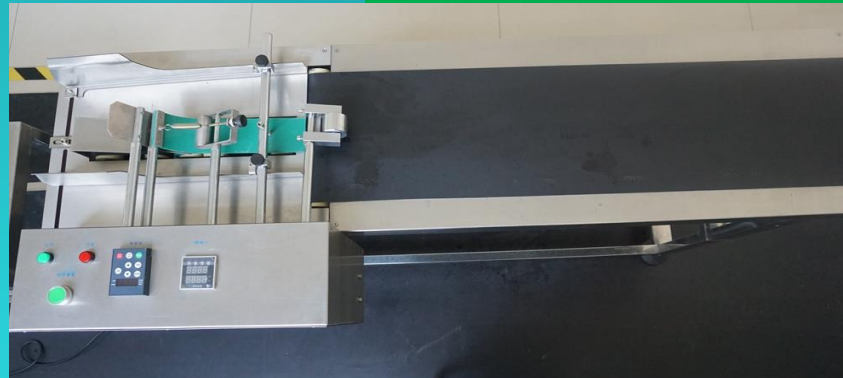

And thus reduce the trifles of manual paging, make full use of the advantages of high speed spray printing of coding machine and improve spray printing

"We're stronger in services, Saver and Faster solution."

Specification

- | | |
|------------------------|--|
| 1. Dimension (WxLxH) | : 300 mm. x 1,500 mm. x 800 mm. |
| 2. Belt Material | : Thickness 2 mm. black PVC |
| 3. Rate Power | : 220V / 50 Hz. |
| 4. Width of separation | : 80 - 300 mm. |
| 5. Machine power | : 200 Frequency conversion. Speed 0 -60 m/min. |
| 6. Body Material | : Stainless steel. |
| 7. Application for | : Suitable for all kinds of paper, cardboard, aluminum foil film, plastic bags . |
